Acme Inc.

Pentest by Strac Comply

Letter of Attestation

Compliance Evidence

Report ID	sample-acme-2026-08-14
Version	3
Report date	14 August 2026
Classification	Shareable
Entity	Acme Inc.
System owner	Platform Engineering
Prepared for	Acme Inc. Audit Committee

Attestation

This letter confirms that an external application penetration test was performed against **https://app.acme.example** during the period **14 August 2026**. Domain ownership verified by DNS.

The target was a production environment.

Testing drew on test cases from the OWASP Web Security Testing Guide v4.2 and the OWASP API Security Top 10 (2023), and followed the phases of NIST SP 800-115 and the PCI SSC Penetration Testing Guidance (2017). Findings are rated with CVSS 3.1. Testing was **automated** and was performed by Strac's automated testing platform.

Independence is asserted on an organizational basis, and testing was automated.

Acme Inc. has received the detailed findings and recommendations in a confidential technical report.

This letter is not an audit, a certification, or an attestation of compliance with any framework, and it confers no compliance status.

Testing ran on 14 August 2026 and evidences the design and existence of controls on that date.

A framework that requires a qualified tester looks for a named, qualified reviewer at the assessed entity.
